FIX for 2012' REPORTS

Have you noticed when you try to run certain reports for 2012 that in the "From" date drop down box, there is an apostrophe after 2012 and there is no 2013?

I can fix this for you! **Please just give me a call!** For those of you who haven't paid for support, you are eligible for this fix since it was our "bug" in the software and we accept complete responsibility.

Depending on how adept you are on your computer, I can either remotely access it and do the fix for you, OR I can send you the fix and you can apply it yourself (with my instructions).

I would have like to make some other improvements, but the only thing I was capable of was increasing the TOTAL field on the Mileage Report so that it would be large enough for a large number of miles. Enjoy!

I apologize for this report date inconvenience in advance!

WEDNESDAYS

Just a reminder— I am generally not in the office on Wednesdays. I babysit my youngest granddaughter on that day.

If you call and leave a message or email me, I will try to get back to you promptly.

GRANT WRITING HELP

Do you need specific information about the population that you serve in order to apply for grants? How do you obtain that information?

CareWorks may be able to help you out! You can either pull out information that you already have in CareWorks OR I can make some suggestions to you on how to classify your Receivers.

Do you need to specify not only if a Receiver is "low income", but what specific income level they fall into? (i.e., \$5,000 to \$15,000, \$15001 to \$25,000, etc.) Do you need to specify if a Receiver is "Frail", but you don't see that on the list of Mobility Types? Does your program reach out to people who need transportation for dialysis? We can set up a Classification as well as a Service Subcode!

Once you have identified particular individuals or groups that you serve, I can help you retrieve that data from the CareWorks database. Then, you can use that information to apply for grants!
