## WHY CAREWORKS?

Some groups are still struggling along using Microsoft Excel® for their program reporting. CareWorks can do so much more! It is a database program designed specifically to keep records of Volunteers and Receivers as well as Community Members and affiliated Congregations. Perhaps more importantly, the reporting features provide invaluable information about the services that have been rendered by those very generous Volunteers!

It is easy to determine which fund raisers were the most successful and which donators to pursue for future events.

If you decide to purchase CareWorks, we will be happy to train new users to help them get the most out of it!

## CareWorks Webinar

Recently, we offered two Webinars to demonstrate CareWorks and had a very good response. Consequently, we now will schedule a webinar at your request and you can invite up to 10 people to participate.

## DATA in CAREWORKS

One of the nicest features in CareWorks is the ability to access your own data. For users who have some capabilities in Microsoft Access®, being able to design your own reports and queries is quite a bonus!

Doris Kilbane, the Program Director of the Faith in Action in Medina, Ohio, is becoming quite the expert at creating new queries to get more out of CareWorks and she is happy to share her knowledge!

## FUNDRAISING IDEAS

Having Annual Dinners is always a good way to raise money. How about adding a fashion show? Local shop owners are often happy to showcase their latest finery and the models can be program Volunteers!

## SUGGESTIONS

We like to hear from Faith in Action groups. If you have a suggestion for a way to improve CareWorks or a feature you would like to see, please email us at:

speck@aboutcareworks.com or call 845-383-3800 ext.101 or our toll free number 866-274-4462.
